

Advance praise for. . .

## Analysts in the Trenches

### Streets, Schools, War Zones

"*Analysts in the Trenches* is an urgently needed book. Drawing on psychoanalytic concepts but not constrained by them, the contributors to this timely volume present innovative programs and practices developed to respond to human suffering in our era's most violent, traumatic situations, from war and forced migration to crime and homelessness. The reader will be inspired by the courage, creativity, and sophistication of clinicians who are socially engaged citizens. A must-read for those who want to know how psychoanalysis can be mobilized to respond to the crying needs of people around the world and right outside our doors."

Neil Altman, Ph.D., Editor, *Psychoanalytic Dialogues*

"What I find most appealing is that the contributors to *Analysts in the Trenches* offered help and a willingness to be part of a professional team rather than claiming to have the answers to complex social problems. The long tradition of analysts working in the community comes to fruition in this exemplary volume, which could well be adopted as the text for courses in community psychoanalysis at every psychoanalytic institute. Editors Bruce Sklarew, Stuart Twemlow, and Sallye Wilkinson deserve our highest praise for this ground-breaking publishing event."

Marvin Margolls, M.D., Ph.D., Past President, American Psychoanalytic Association
